3. Courses/Workshops/Training/Conferences

Introducing your National Assembly for Wales Outreach team

Ever wondered how you can have more of a say in decisions made at the National Assembly for Wales?

Why not get in touch with the Assembly's Outreach team?

The Assembly have community outreach officers who can deliver free workshops for community groups and organisations across Wales. These can range from a general introduction to how the Assembly works and how you can have your say to workshops which support community groups to campaign about the issues that matter most to them.

You can find out more about what the workshops include on their website.

If you have any questions or would like to book a workshop for your group please contact the Outreach team on seneddoutreach@assembly.wales or call 0300 200 6565.

5. Publication of Circular 008/2018 – Planning requirement

Publication of Circular 008/2018 – Planning requirement in respect of the use of private sewerage in new development, incorporating septic tanks and small sewage treatment plants. Today a new Circular has been published in order to provide updated guidance to planning authorities and developers on the management of private sewerage as part of new developments. This Circular supersedes advice contained in Circular 10/99 – Planning Requirement in respect of the Use of Non-Mains Sewerage incorporating Septic Tanks in New Development. The purpose of updating Circular 10/99 is to ensure national planning guidance is reflective of current legislative and wider requirements with regards to private sewerage schemes as part of new developments having regard to the previous Circular being published in 1999. The key changes include:

- Reflecting the current position on bodies that provide advice on matters relating to private sewerage in Wales;
- Updating references to legislation in this subject area, including the Environmental Permitting (England and Wales) Regulations 2016. These Regulations require an environmental permit to be obtained from Natural Resources Wales for developments which discharge treated sewage effluent over certain thresholds and the need for records to be kept for 5 years on the maintenance of treatment systems

for private sewerage provided as part of new developments; and • Providing clarity on the types of treatments available for private sewerage, including on the use of package plant treatments and cesspools. The Circular is available to download here:
